Objective

Motivated first-year engineering student at National Institute of Technology Srinagar with strong interest in Machine Learning and Artificial Intelligence. Skilled in Python, data analysis, and building ML projects using modern development tools.

Education

National Institute of Technology Srinagar — Bachelor's Degree (1st Year)

Technical Skills

- Python, SQL
- Scikit-learn, XGBoost
- PyTorch, Neural Networks
- Pandas, NumPy, Matplotlib, Seaborn
- Git, GitHub, Linux, Jupyter Notebook, VS Code
- Data Preprocessing, Feature Engineering, Model Evaluation

Projects

Loan Approval ML Pipeline

Built an end-to-end ML pipeline for loan approval prediction using Python, Pandas, Scikit-learn, and XGBoost.

Customer Segmentation using K-Means Clustering

Implemented K-Means clustering for customer segmentation and visualized clusters using data visualization libraries.

Deep Learning Experiments with PyTorch

Built and trained neural network models while exploring training optimization and learning rate tuning.

Achievements & Activities

- Active learner in Machine Learning and AI through self-driven projects and experimentation.
- Experienced with Linux-based development workflows and open-source tools.
- Regularly contribute and maintain coding projects on GitHub.
